

Run 10 Status

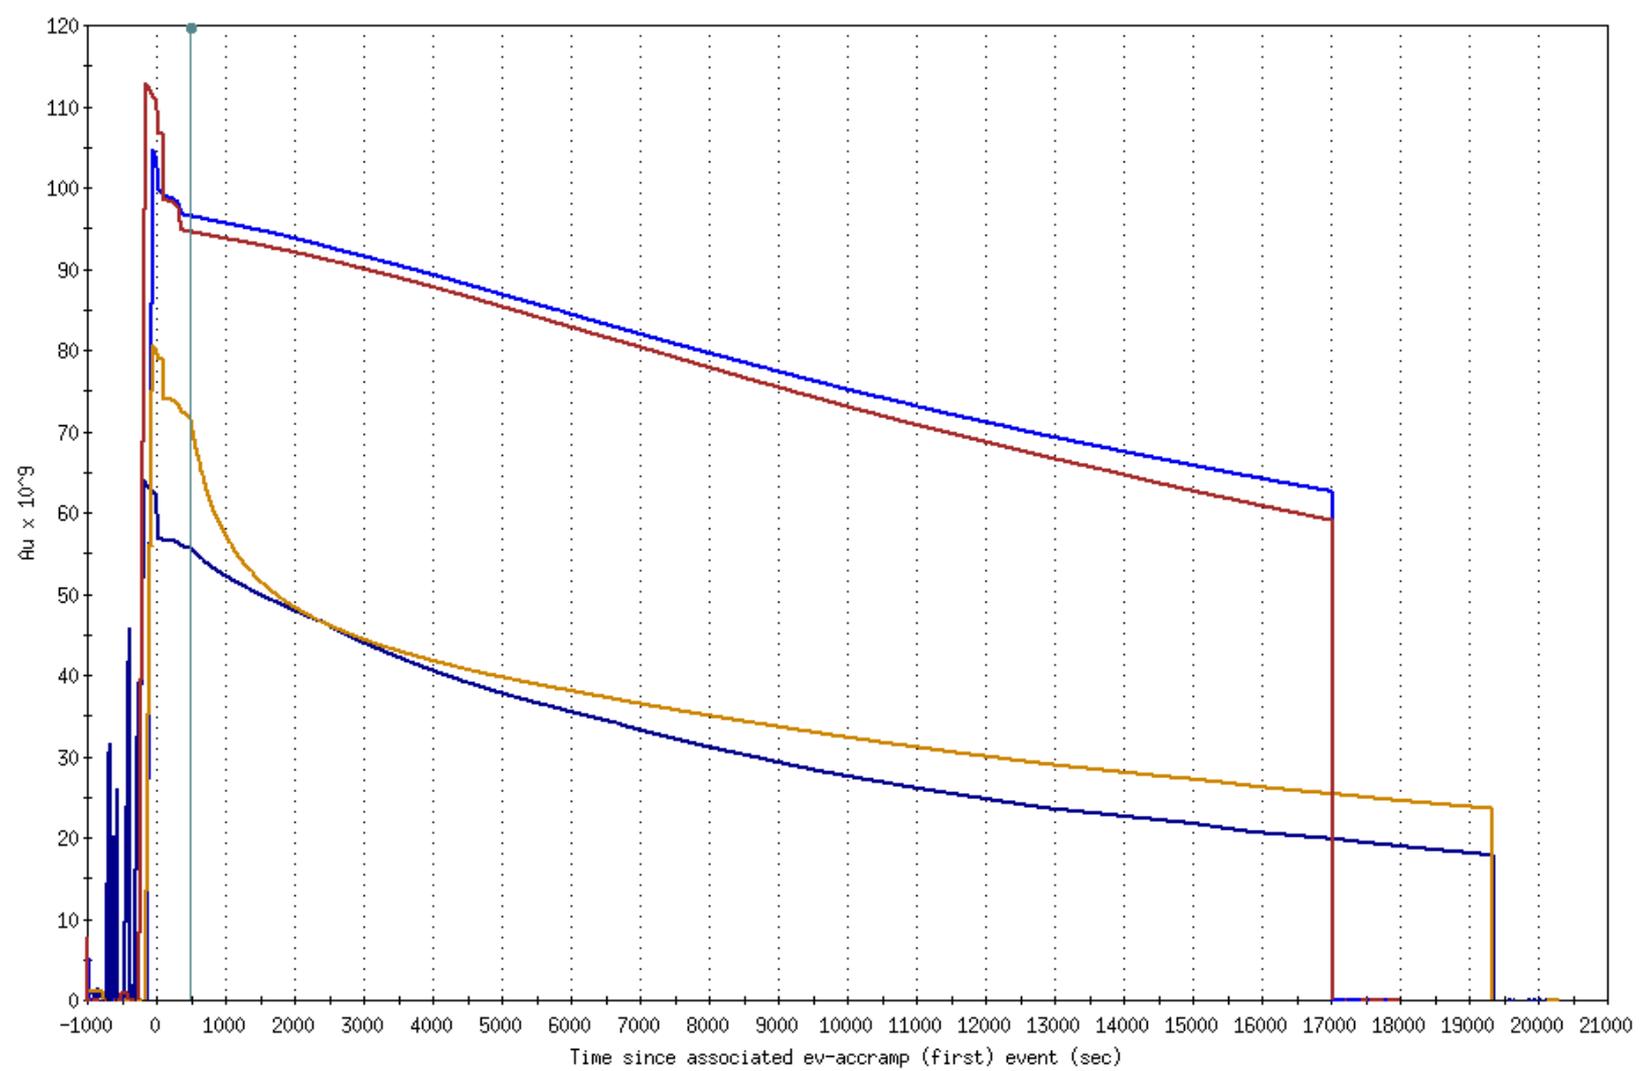

<http://www.cadops.bnl.gov/AP/RHIC2010/>

<http://www.cadops.bnl.gov/AP/RHIC2010/>

Status

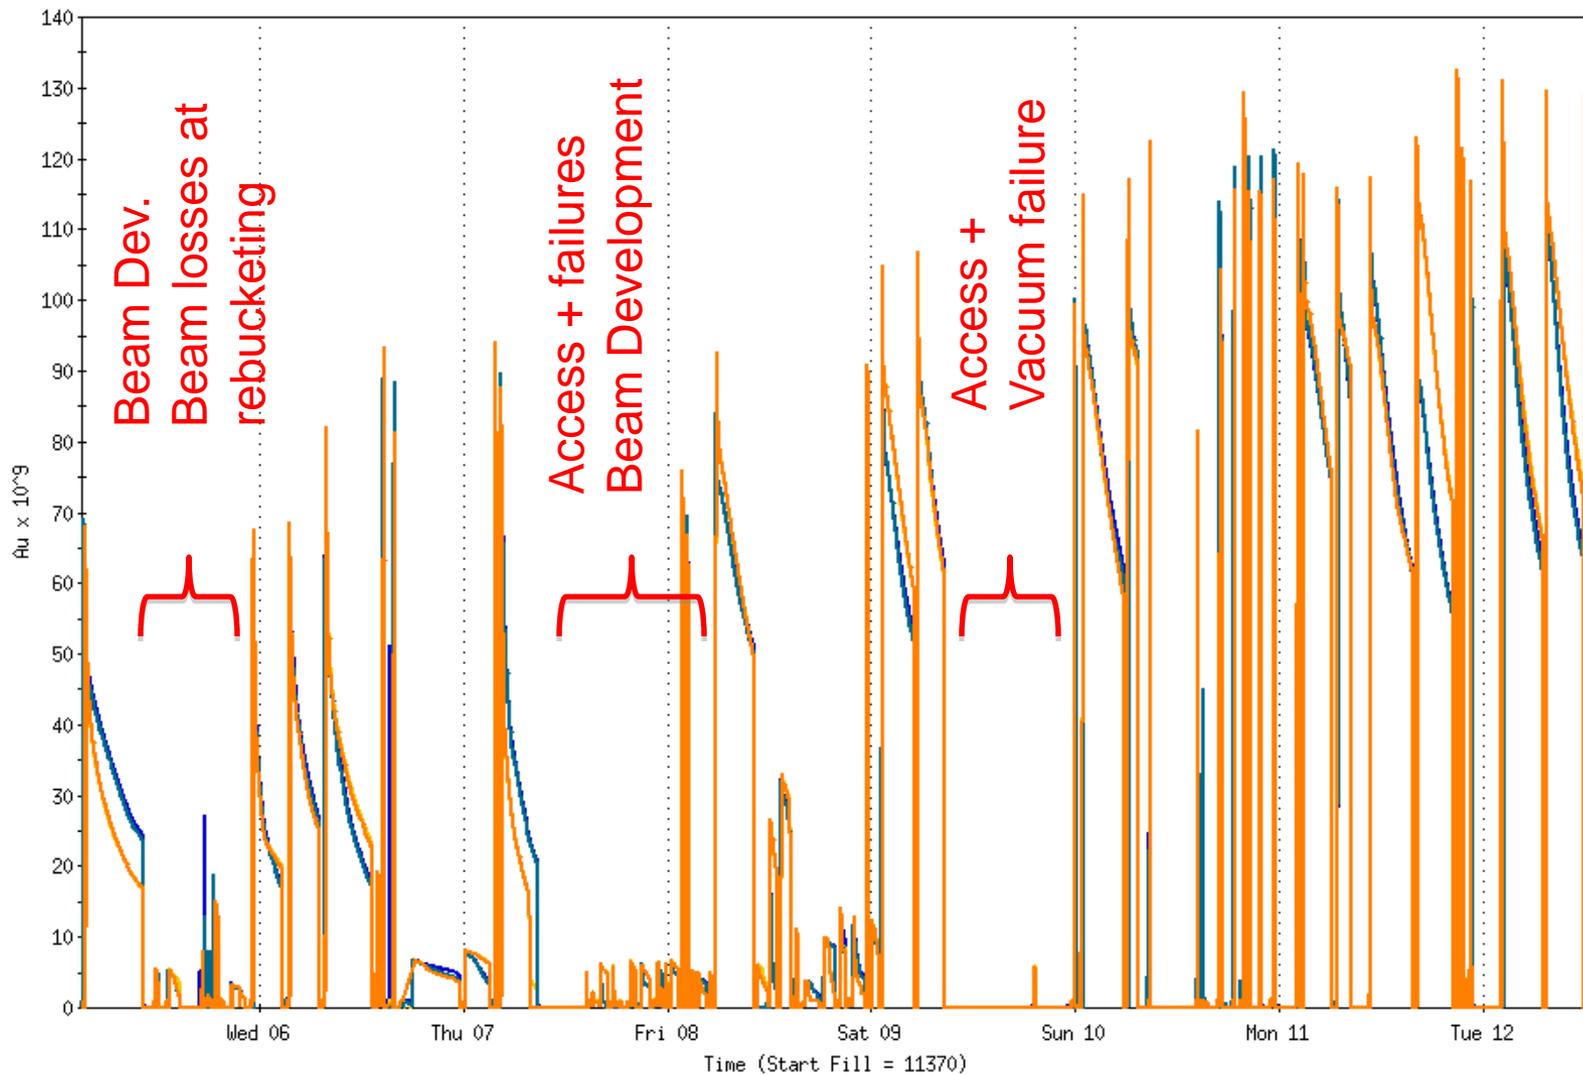

- Running with 111x111, 1.1e9 ions/bunch
 - Still without rebucketing
- Working on increasing intensity/bunch
 - Looking to get $>1.2e9$ ions/bunch
- Stochastic cooling commissioning
 - Focusing on Yellow Transverse (vertical)
 - Yellow longitudinal – vacuum problem

RHIC - DCCT total beam & WCM bunched beam

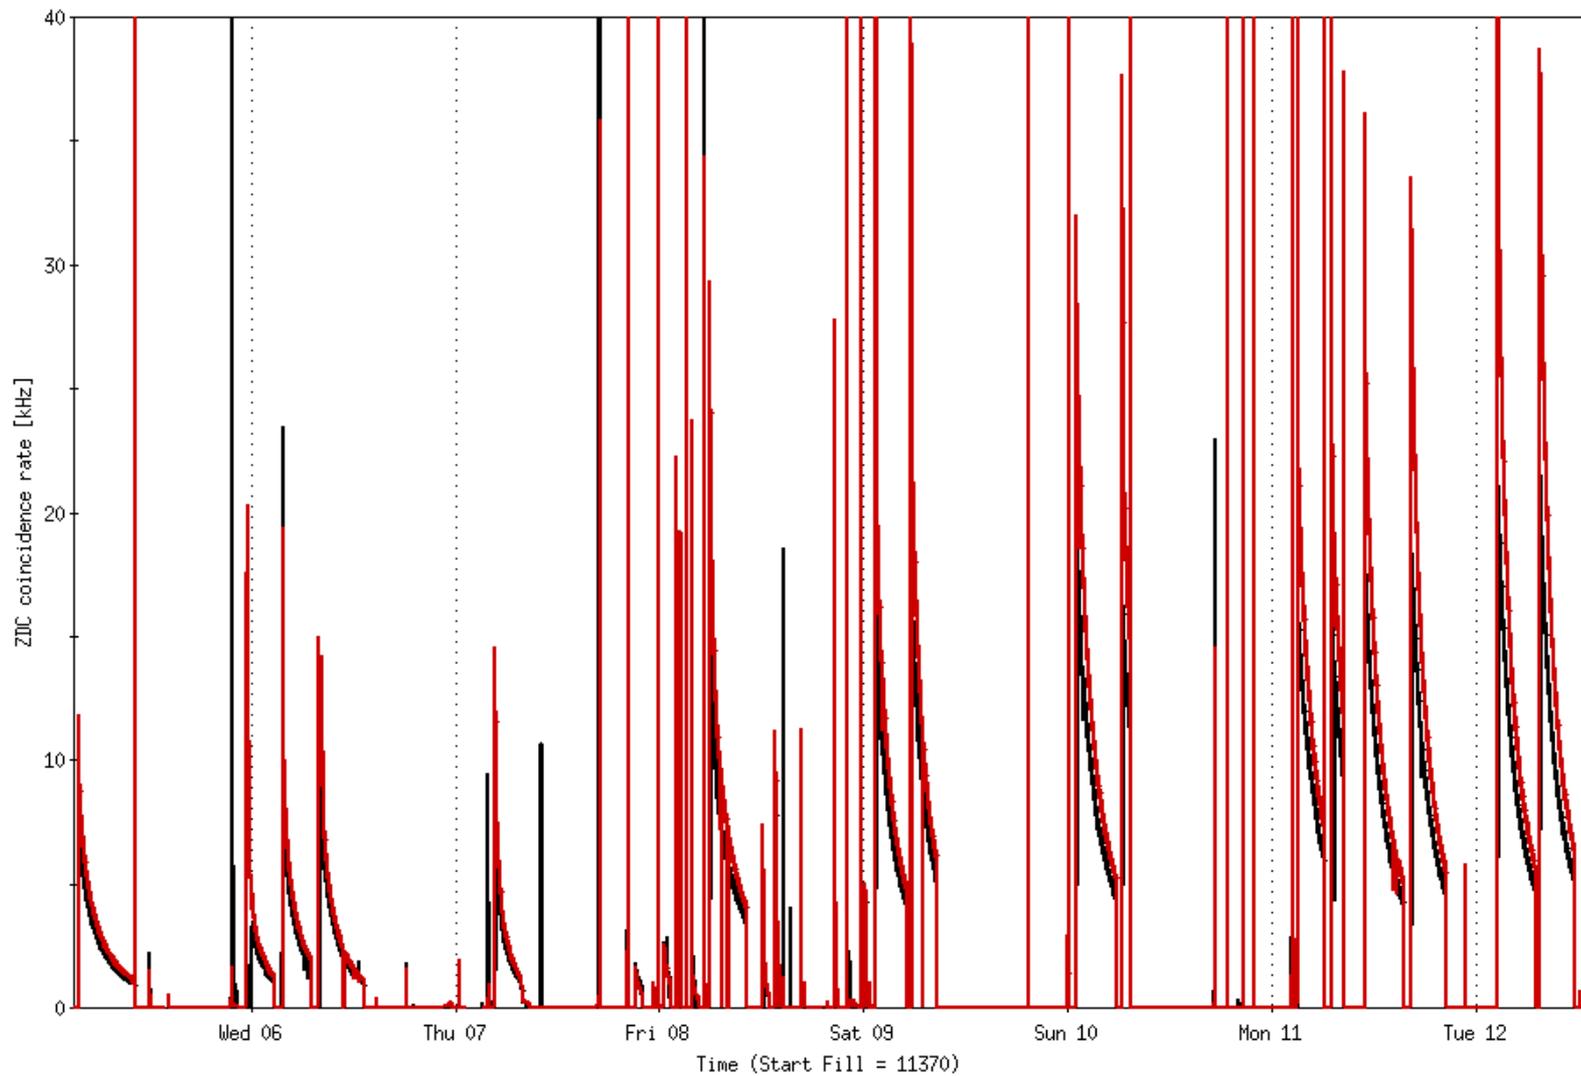

- bluDCCTtotal:11376
- bluDCCTtotal:11411
- yelDCCTtotal:11376
- yelDCCTtotal:11411
- ev-brebuckettrig:11376
- ev-yrebuckettrig:11376

RHIC - DCCT total beam & WCM bunched beam

— blueDCCTtotal — yeDCCTtotal — blueWCMbunched — yeWCMbunched

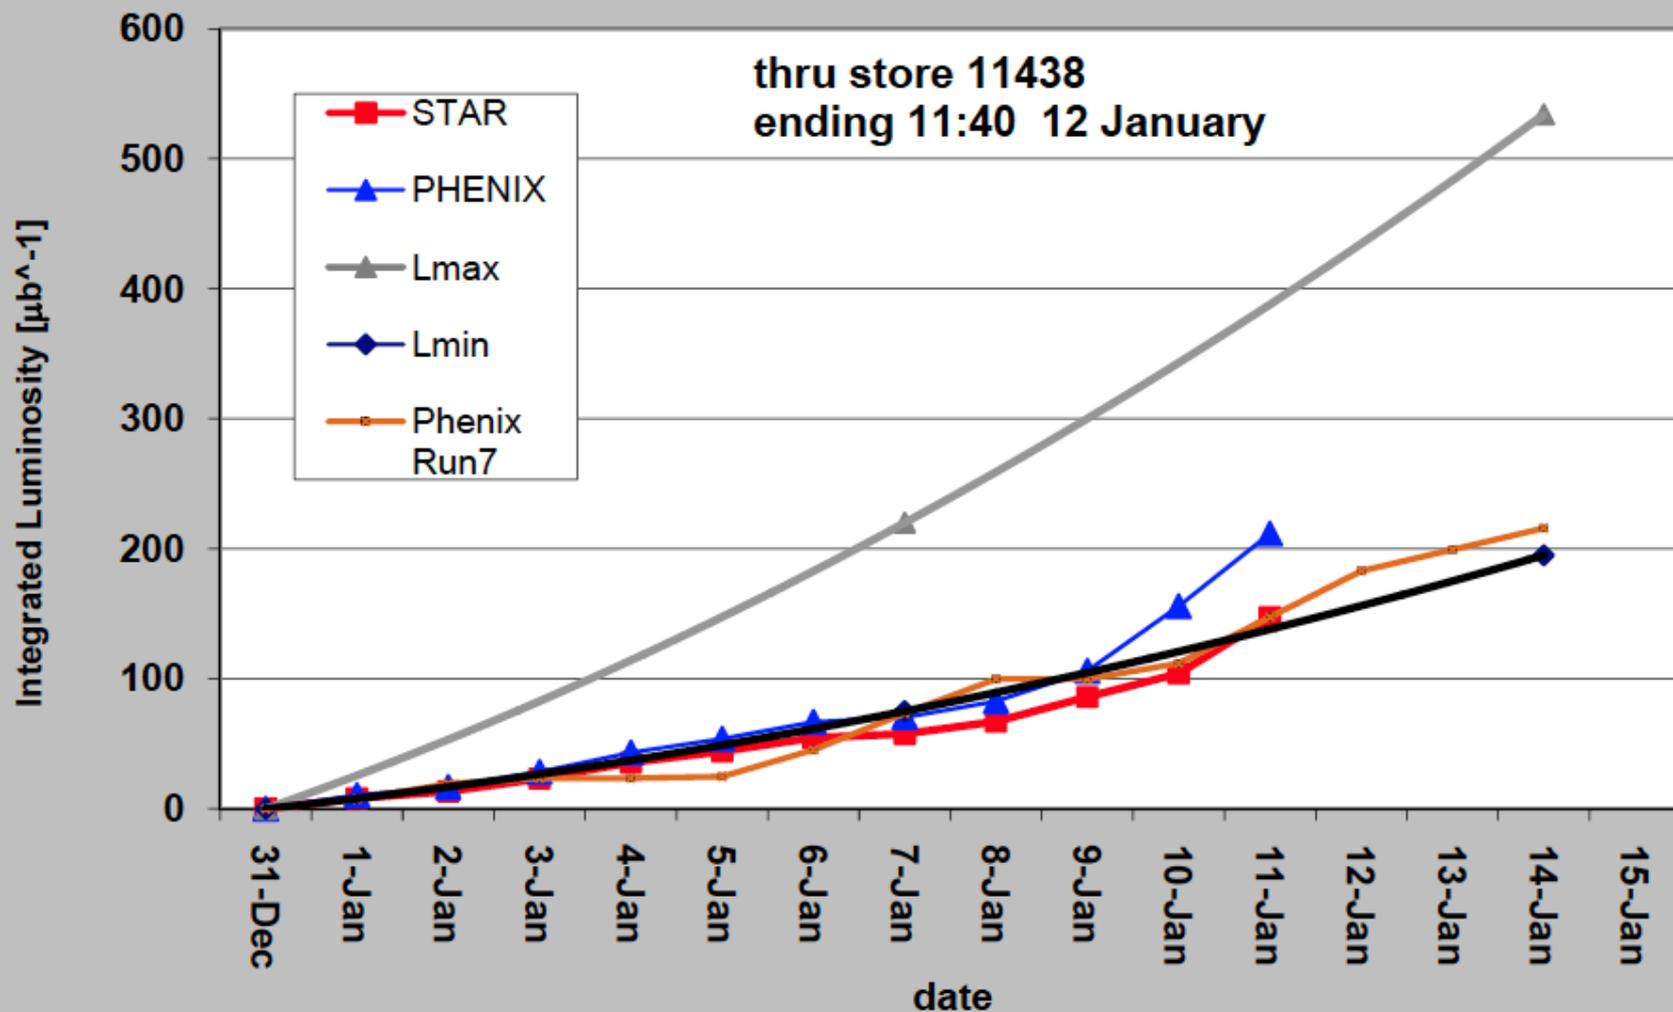

Experimental Coincidence Signals

— STAR..ZDC. — PHENIX..ZDC.

Run10 RHIC AuAu Integrated Luminosity for Physics

thru store 11438
ending 11:40 12 January

Priorities

1. Run Physics
 - Raise intensity/bunch if possible
 - Improve any losses (yellow transition)
 - Keep backgrounds minimized
2. Stochastic Cooling commissioning
3. Getting Rebucketing working at high int.
