

# STAR Run 10 - Au+Au 200 GeV Status: As of 8am March 9nd

# STAR Run 10 - Au+Au 200 GeV Status

---

- Mar. 1-7: 88.5 hrs of production DAQ running - **New Record!**
- All our physics goals accomplished
- Subsystems are running smoothly

## Low luminosity store request for AuAu 200 GeV

- Near the end of AuAu200 GeV run (Monday March 15<sup>th</sup>)
- Store length ~ 1.5 hours
- Collision rate < 500 Hz
