

STAR Summary for June 14th-20th

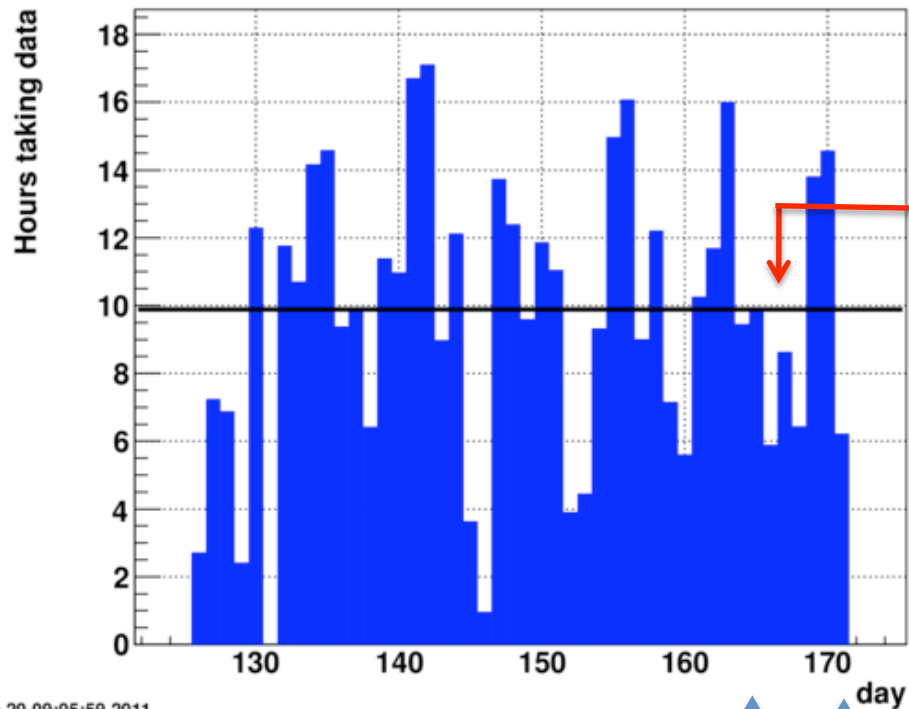

Yifei Zhang

June 21st, 2011

Last week at STAR

hours_perday.txt

Mon Jun 20 09:05:59 2011

165 - 171

In the last week:

June 14: continue Au+Au 200 GeV

June 15: access

June 16: beam development

June 17: evening thunderstorm

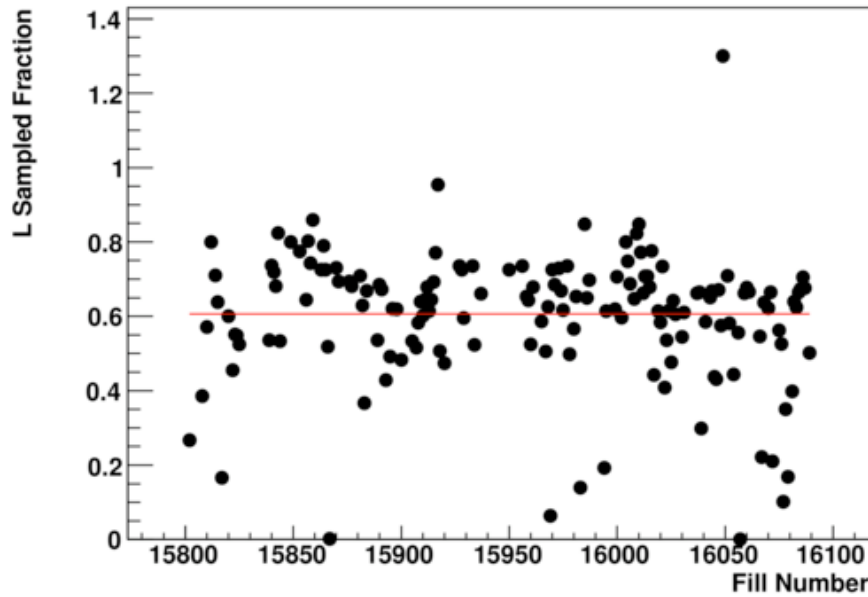

June 18-19 (weekend):
efficient data taking

June 20: 200 GeV ended.

June 20-21: prepare for 27 GeV.

205 M events taken this week

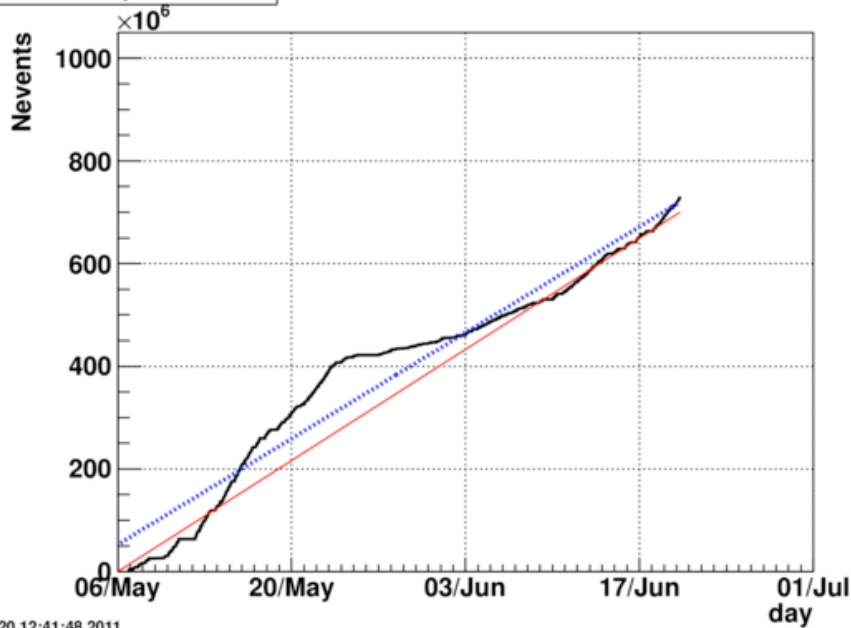

L Sampled Fraction

Sample fraction still ~ 61 %

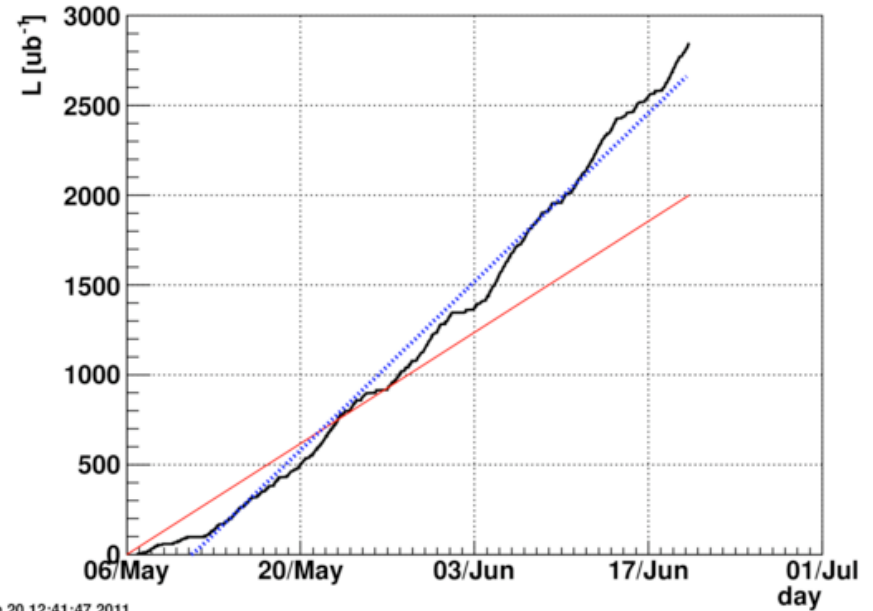

Both RHIC and STAR did great job.
We've accomplished / exceeded
our goal.
Final vpd-zdc-mb-protected:
~730 M events
