

Polarized Protons: 100 to 255 GeV

Polarized Protons: 255 GeV

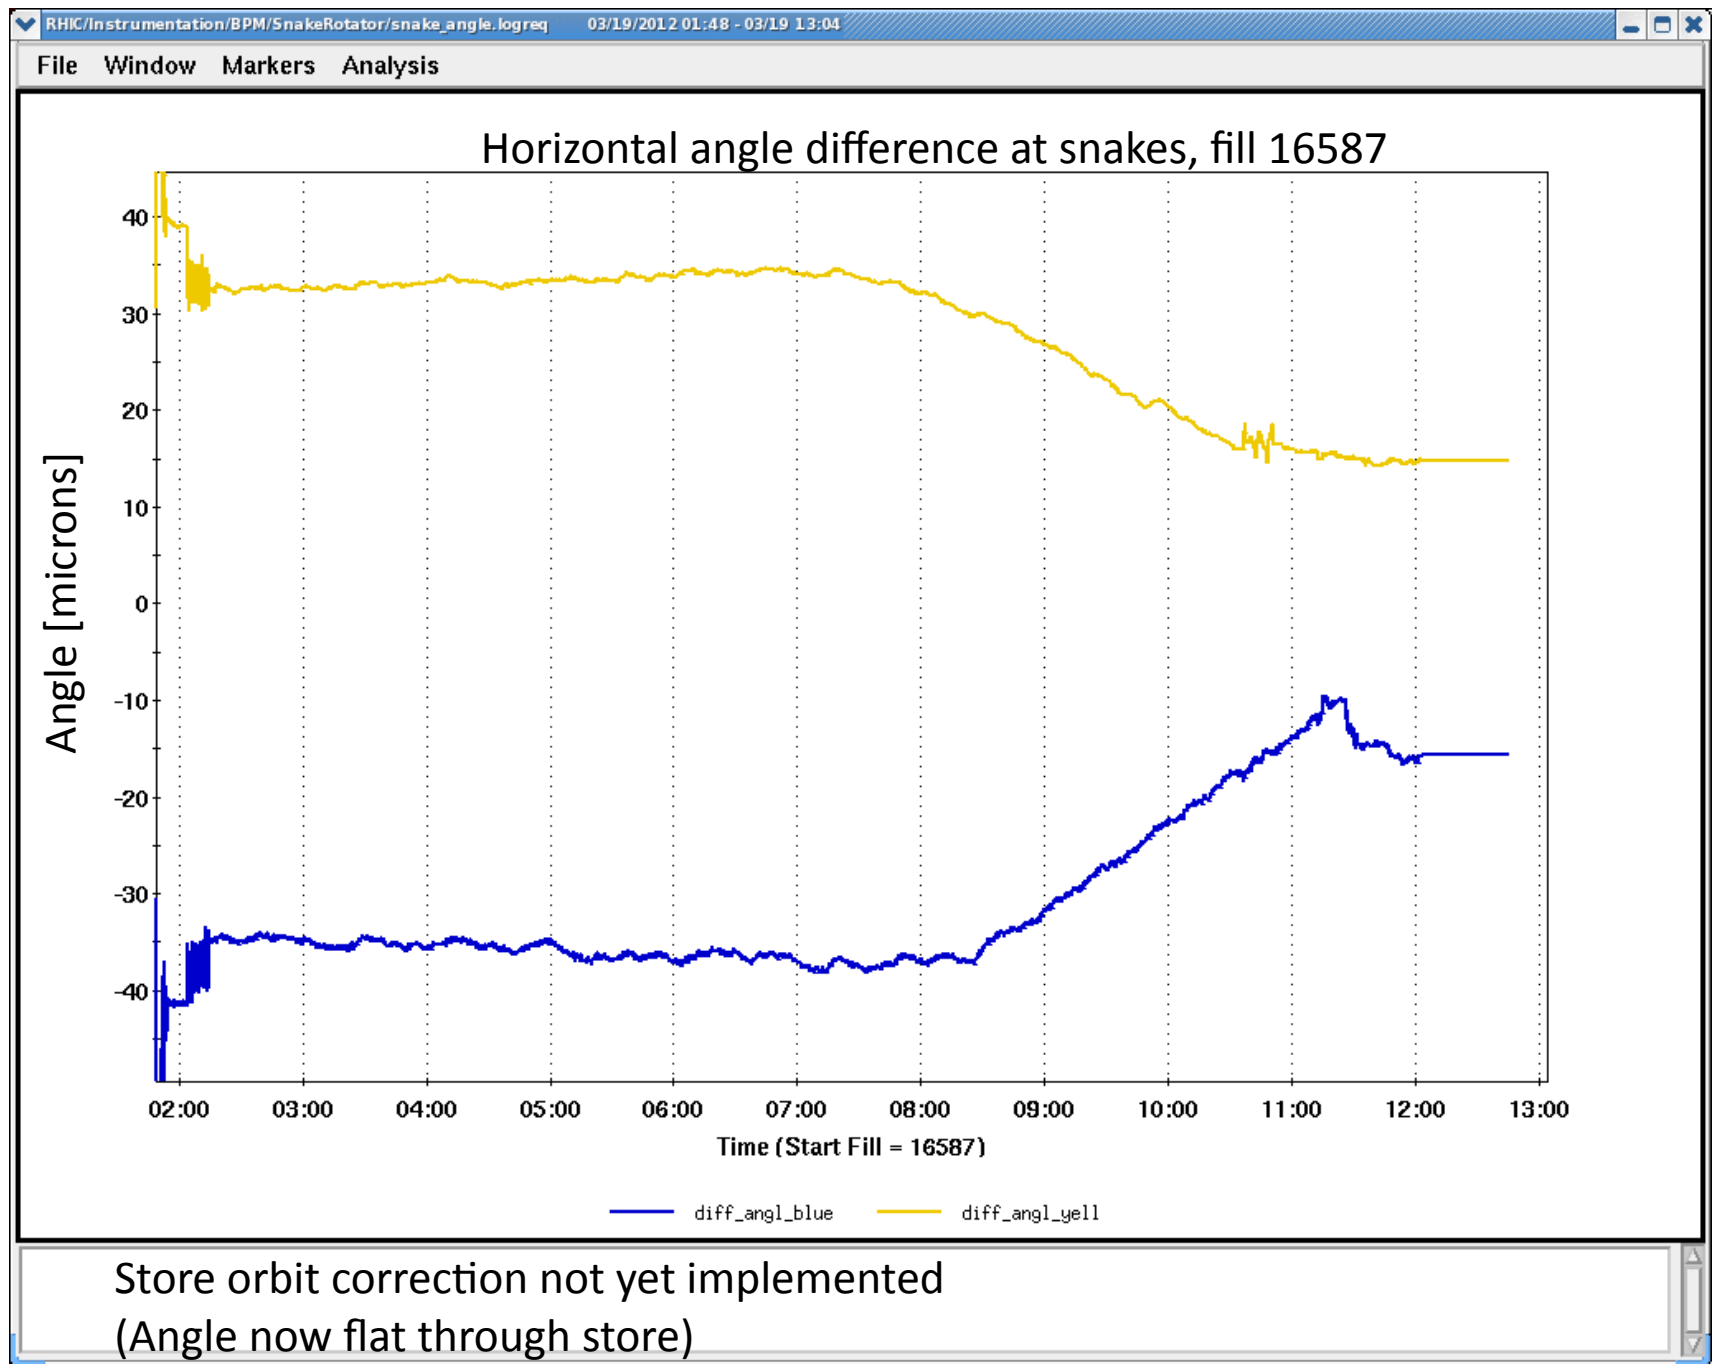

Jet Polarization by Intensity, 255 GeV

To be done:

- Thursday development
 - RF damping work: improve longitudinal emittance
 - Local decoupling: possible polarization transmission improvement on the ramp
- Emittance improvements
 - AtR transmission
- Vertical orbit angle at snakes
 - Change store-to-store, attempt to improve polarization lifetime

RHIC pC Offline, fill 16587
