

# STAR Status Update Time meeting

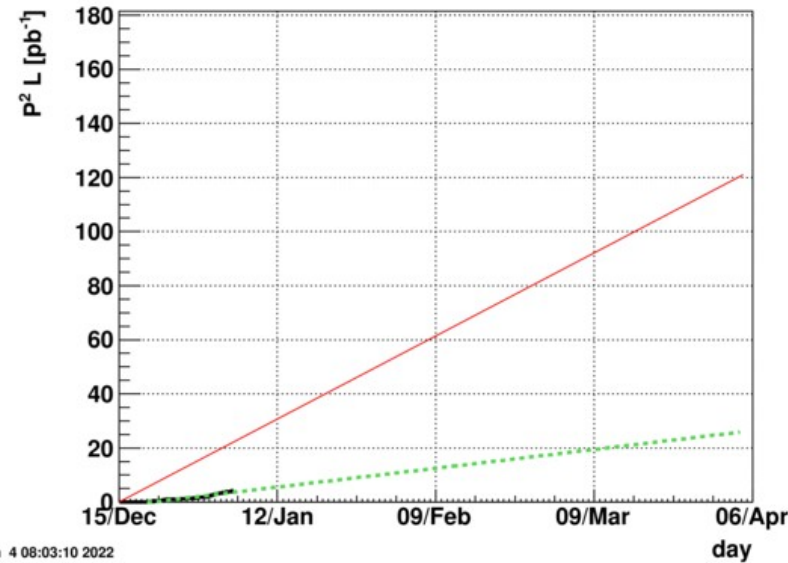

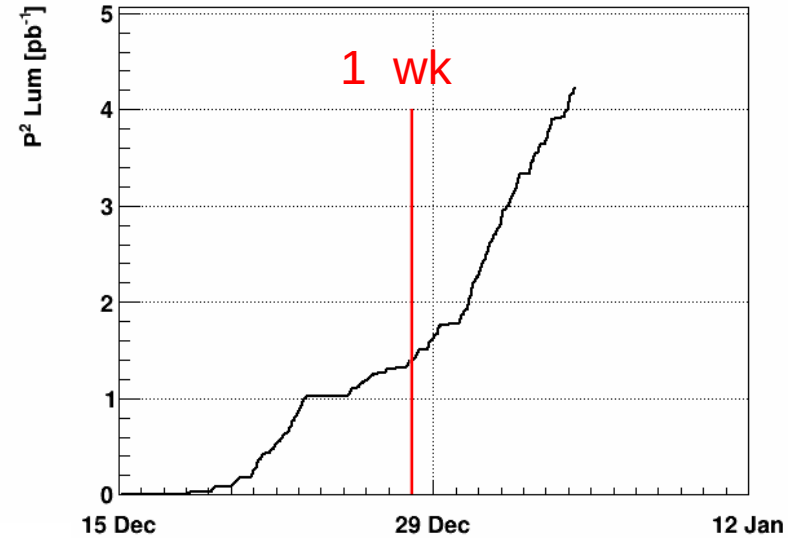

Isaac Upsal  
01/04/22

# Collected triggers

BHT3

- Plots show collected BHT3 triggers: polarization<sup>2</sup> \* Luminosity
- Top plot shows the number on its own, bottom plot shows the projection relative to the goals

# Access schedule

- This last week we asked for several short accesses. Largely this is to fix and diagnose an issue with the BBC VME crate stopping runs
  - 12/28 replace board for FCS LV (30 min)
  - 12/31 replace DSM board for BBC (30 min)
  - 01/01 replace another DSM for the BBC + powercycle sTGC HV (1h)
  - 01/03 Powercycle VME crates (10 min – during scheduled CeC access)
  - 01/04 Inspect sTGC gas lines + disconnect DSMs from BBC crate backplane (15 min)
- Tomorrow: 10h access. STAR needs to remove poletip for work. Several tasks will be completed.
